Not Completed: Electrical Engineering
Option Audiovisual

PROFESSIONAL SUMMARY

Skilled and results-driven Developer with expertise in **Java**, **C++**, **C#**, and front-end frameworks such as **React**, **Vue.js**, and **Angular**. Proficient in both **SQL** and **NoSQL** database management. Strong foundation in **optimizing code efficiency** and streamlining development processes. Experienced in debugging complex software issues, building reusable code libraries, and supporting application enhancements in **Agile** environment. Known for a proactive approach to problem-solving, **leadership**, and collaboration in cross-functional teams. Bilingual in **French** and **English**, with excellent communication skills. Committed to continuous learning, staying ahead of industry trends, and delivering high-quality solutions that align with business goals.

WORK HISTORY

Blax - Junior Developer

Remote • 02/2023 - 09/2024

- **Debugged and resolved complex software issues**, resulting in a **80% decrease in post-release bugs** and contributing to a more stable and reliable product release.
- **Proactively updated skills** through continuous learning (training courses, workshops, and self-study), ensuring the team stayed ahead of industry trends and leveraged emerging technologies.
- **Led initiatives to streamline development processes**, creating reusable code libraries that reduced development time by 20% and significantly increased team productivity and by refactoring old codebases.

Micro Focus Software Development - Software Developer Intern

Remote • 06/2022 - 05/2023

- **Collaborated with cross-functional teams** to design, develop, and implement tailored software solutions, ensuring alignment with key business objectives and improving overall operational efficiency.
- Translated **customer requirements into actionable use cases**, streamlining project execution and enhancing communication between technical and non-technical stakeholders.
- **Enhanced software functionality** by identifying and resolving complex coding challenges, resulting in improved application speed, reliability, and user satisfaction.

Solotech - TECHNICIENNE VOLANTE, Puis TECHNICIENNE D'ATELIER

5200 Hochelaga Street, Montreal, QC • 06/2019 - 03/2020

- **Thrived in fast-paced environments**, adapting quickly to changes and maintaining high productivity, similar to the dynamic and fast-changing nature of software development sprints.
- **Managed multiple tasks and priorities efficiently**, ensuring timely completion of assignments—skills transferable to managing software development deadlines and handling multiple projects simultaneously.
- Demonstrated **strong self-motivation** and a high level of **personal responsibility**, consistently achieving targets and ensuring accuracy, a mindset that translates to consistently meeting coding and project goals.
- **Took initiative to lead projects**, coordinating workflows and motivating team members to achieve objectives, showcasing leadership skills that are applicable to leading development projects.
